At BrainCert, we put our users first in how we develop our products and services. As a registered user with the BrainCert platform, you can request that your account either be disabled or permanently deleted. To temporarily disable your account, simply [email](#) our friendly support team.

To request an account be permanently deleted expresses your intention to fully remove both your user account and any existing information relevant to your user account. This can be undone by sending an [email](#) to BrainCert support team, and we'll be able to recover any of your data including your uploaded contents. We'll recover your data after "account deletion" at no additional cost.

To delete your account permanently, go to account '[Settings](#)' page, and click on the "Delete Profile" link.

Edit profile

You'll be logged out and it will not allow you to sign in again. This confirms your account is now deleted.
