Redirect your attendees to the specified URL after the classroom session ends.

The screenshot shows a sidebar menu on the left with options: Rooms, Recordings, Hostname & SSL certificate, Landing Page, Theme & Branding, Redirect URL (highlighted), Disk Usage, and Email analytics. The main content area has a notification at the top: "Your Tutor Plus plan allows 5 rooms. [Change Plan]". Below this is a "Redirect URL" configuration box. It contains a "Select Room" dropdown menu with "Demo for test" selected. Below the dropdown is a text input field containing "https:// www.braincert.com/p/demo-for-test". A light blue informational box below the input field explains that the API endpoint automatically posts parameters like "&roomId=123&userId=456&userName=Teacher&isTeacher=1" to the URL. A green "Save" button is at the bottom of the configuration box.

Step 1: Goto <https://www.braincert.com/app/bcrooms>

Step 2: Click Redirect URL from the menu --> Select the respective meeting room from the drop-down. It will auto populate along with the meeting room invite link which is shown in the above picture.

Step 3: Once the setting is done SAVE it.
